DETAILED ACTION

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark D. Elchuk on 12-13-04.

The application has been amended as follows:

In claim 14, "sub-plurality" has been replaced with --plurality--.

The amendment has been made to overcome lack of antecedent basis.

Allowable Subject Matter

2. Claims 1-21 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art of record fail to teach or suggest alone or in combination, the limitations: "a stripline waveguide in communication with the dielectric (air) filled waveguides for further dividing and distributing the EM wave energy to a plurality of radiating elements" in a manner claimed in claims 1, 5, 10, 14, 17 and 21. It is for these reasons in combination with all the other limitations in the independent claims 1, 5, 10, 14, 17 and 21, that claims 1-21 are allowable over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2821

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chung (US 6,297,774); Buer et al. (5,923,289); and Chu et al. (5,557,291); also teaches similar inventive subject matter. However the prior art listed above neither teach nor disclose the limitation described above for reason of allowance either alone or in combination.
